Academic Profile

Professor of Mechanical Engineering with nearly two decades of university teaching experience across core mechanical engineering, design, and computational mechanics. Extensive experience mentoring undergraduate and graduate students, supervising capstone/design projects, and connecting analytical foundations with finite element analysis, experimentation, and engineering practice. Extensive professional engineering and industrial consulting experience provides an industry perspective for classroom and laboratory instruction. Teaching interests span mechanics, design, thermal-fluids, system modeling, finite element analysis, and engineering laboratories.

Education

Lehigh University, **Bethlehem, PA, US**

Ph.D. in Mechanical Engineering, January 2001

- Dissertation: "Contact Mechanics of FGM Coatings"
  Advisor: Prof. Fazil Erdogan

Lehigh University, **Bethlehem, PA, US**

M.S., Mechanical Engineering, June 1996

- Thesis: "The Problem of a Rigid Punch with Friction on a Graded Elastic Medium"
  Advisor: Prof. Fazil Erdogan

Sussex University, **Brighton, UK**

M.S., Computer Technology in Manufacturing, September 1991

- Thesis: "Self Organizing Control of Hardboard Manufacturing and Coupled Tank Systems"
  Advisor: Prof. Andrew W. Self

Middle East Technical University, **Ankara, Turkey**

B.S., Mechanical Engineering, June 1990

- Senior Design Project: Computer Aided Selection of DC Servomotors
  Advisor: Prof. I. Huseyin Filiz

Academic Experience

American University of the Middle East (AUM), **Kuwait**
Professor (Full-time) **Sep. 2018 - present**
Head of Research Committee of the Mechanical Engineering Department.
Taught undergraduate courses across core mechanical engineering, including Statics, Mechanics of Materials, Engineering Materials, Machine Design, Engineering Design, System Modeling and Analysis, Thermodynamics, Fluid Mechanics, and Hydraulics.

TOBB University of Economics and Technology, **Ankara, Turkey**
Professor (On leave) **Sep. 2018 - Dec. 2022**
Professor (Full-time) **Oct. 2015 - Sep. 2018**
Associate Professor **Jul. 2010 - Oct. 2015**
Assistant Professor **Sep. 2006 - Jul. 2010**
Taught courses from sophomore level to graduate level, which covered the areas of statics, dynamics, machine design, finite element method for mechanical engineers and theory of elasticity.

Near East University, **Nicosia, N. Cyprus**
Professor (Part-time) **Sep. 2014 - Sep. 2018**
Taught junior level machine design courses

University of Arizona, **Tucson, AZ, US**
Visiting Research Scholar **Feb. 2014 - Jun. 2014**
Conducted research in modeling hyperelastic materials using peridynamic theory for the project funded by Department of Aerospace and Mechanical Engineering of University of Arizona *Fulbright Research Scholar* **Aug. 2013 - Feb. 2014**
Conducted research in modeling composite materials using peridynamic theory for the project titled "Development of a method to predict strength and failure of layered composites using peridynamic theory" funded by Fulbright

Virginia Commonwealth University, **Richmond, VA, US**
Visiting Research Scholar **Jun. 2007 - Sep. 2007**
Conducted research in springback prediction of Advanced High Strength Steels used in automobile components.

Lehigh University, **Bethlehem, PA, US**
Research Assistant **Jan. 1994 - Sep. 2000**
Research focused on stress analysis and fracture characterization of ceramic coatings on metal substrates, involving both mechanical and thermal stresses. Developed analytical models to study the contact mechanics of Functionally Gradient Materials (FGMs).

Teaching Experience and Interests

Broad teaching experience from sophomore through graduate level in core mechanical engineering, design, and computational mechanics. Teaching interests include Statics, Dynamics, Mechanics of Materials, Engineering Materials, Machine Design, Engineering Design/Capstone, System Modeling and Analysis, Thermodynamics, Fluid Mechanics, Hydraulics, Finite Element Analysis, and related mechanical engineering laboratories. Interested in developing laboratory and project-based activities that connect engineering fundamentals with computation, experimentation, design, and professional practice.

Courses Taught

TOBB University of Economics and Technology (TOBB ETU), **Ankara, Turkey**
MAK 104 Statics [(Spring – 2007, 2008, 2017) (Summer – 2008)]
MAK 203 Dynamics [(Fall – 2006)]
MAK 206 Strength of Materials [(Fall – 2006) (Summer – 2008) (Spring – 2013, 2015, 2017)]
MAK 312 Machine Elements [(Fall - 2008, 2014, 2015) (Spring – 2010, 2012)]
MAK 404 Mechanical System Design [(Spring – 2009) (Fall – 2009, 2011) (Summer – 2012)]
MAK 444 Automotive Engineering [(Spring – 2013) (Summer – 2016)]
MAK 410 Finite Element Methods [(Fall – 2008)]
MAK 501 Engineering Mathematics [(Fall – 2010, 2011, 2012, 2014, 2015, 2016)]
MAK 506 Theory of Elasticity [(Spring – 2009) (Fall – 2010)]
MAK 510 Finite Element Methods [(Spring 2007) (Fall 2016)]

Near East University, **Nicosia, N. Cyprus**
ME 303 Machine Design I [(Fall – 2014, 2015, 2016)]
ME 304 Machine Design II [(Spring – 2015, 2016, 2017)]

American University of the Middle East (AUM), **Egaila, Kuwait**
ME 270 Basic Mechanics I [(Fall – 2022, 2023) (Spring– 2020, 2021, 2023)]
ME 309 Fluid Mechanics [(Fall – 2024)]
ME 323 Mechanics of Materials [(Fall – 2018, 2020) (Spring– 2020) (Summer– 2019)]
ME 352 Machine Design I [(Fall – 2018, 2019) (Spring – 2019, 2026)]

ME 375 System Modeling and Analysis [(Spring – 2024, 2026) (Fall - 2025) (Summer - 2026)]
ME 452 Machine Design II [(Fall – 2018, 2019, 2020, 2021, 2022,2023,2024) (Spring – 2019, 2020, 2021, 2022, 2023, 2024) (Summer– 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026)]
ME 463 Engineering Design [(Fall – 2020, 2022) (Spring – 2020, 2021, 2022, 2023, 2024, 2026)]
ME 200 Thermodynamics I [(Fall - 2025)]
PHYS 172 Modern Mechanics [(Fall - 2025)]
CVL 297 Basic Mechanics: Statics [(Fall - 2024, 2025)]
CVL 340 Hydraulics [(Summer - 2025)]
CE 231 Engineering Materials I [(Spring - 2026)]

Student Mentoring

Supervised and co-supervised Ph.D. and M.S. students in computational mechanics, structural analysis, crashworthiness, fatigue, composites, peridynamics, finite element analysis, and mechanical design. Advised senior engineering design projects with strong industrial and computational components. A detailed list of graduate students appears later in this CV.

Honors and Awards

Listed in Top 2% Scientists Worldwide by Stanford University, since 2020

Editorial Board Member, Thin-walled Structures, ELSEVIER, since 2018

Associate Editor, Measurement and Control, SAGE, since 2024

Editorial Review Board, Journal of Applied Biomaterials & Functional Materials, SAGE, since 2025

Fulbright Visiting Research scholarship to University of Arizona, 2013

The most cited articles for the paper entitled "The effect of geometrical parameters on the energy absorption characteristics of thin-walled structures under axial impact loading" in International Journal of Crashworthiness

The most cited articles published for the paper entitled "Multi-objective crashworthiness optimization of tapered thin-walled tubes with axisymmetric indentations" in Thin-Walled Structures

The most cited articles published from 2004 to 2008 for the paper entitled "Contact mechanics of graded coatings" in International Journal of Solids and Structures.

Professional Experience

The Scientific and Technological Council of Turkey (TÜBİTAK), **Ankara, Turkey**
Executive Committee Member for MAKİTEG Group **Apr, 2017 - Sep, 2018**

- Served as a committee member for evaluating research projects received from manufacturing industry submitted to Machinery, Manufacturing Technologies Group (MAKİTEG).

Executive Committee Member for USETEG Group **Apr, 2015 - Apr, 2016**

- Served as a committee member for evaluating research projects received from automotive industry submitted to for Transportation, Defense, Energy and Textile Technologies Group (USETEG).

SANKO / MST Construction Equipment, **Gaziantep, Turkey**
Engineering Consultant **2016 - 2018**

- Provided structural analysis and fatigue engineering consultancy for welded telescopic booms used in MST telehandlers. Supported finite element analysis and fatigue-life assessment, evaluation of critical welded regions using Eurocode 3, BS 7608, IIW, and FKM methodologies, and correlation of numerical predictions with strain-gauge measurements and static/fatigue testing.

Arçelik Dishwasher Inc., **Ankara, Turkey**
Project Consultant **Sep, 2013 - Sep, 2015**

- Principal investigator of the industrial project titled “Optimization of the structural parts and packaging of a dishwasher using Finite Element Method" funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK TEYDEB Project number 5150016).

Oyak Renault Inc., **Bursa, Turkey**
Project Consultant **Sep, 2011 - Jun, 2013**

- Helped Renault Engineers in doing FEA analysis of side crush analysis for the project titled "Renault Fluence mid-floor part monolithic design and production of the prototype by hot forming technology" funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK TEYDEB Project number 3110357)
- performed dynamic Analysis of a VSP support bracket
- designed a shock absorbing component for a front bumper
- conducted frontal crash analysis for the design of an automobile cockpit carrier

GE Marmara Technology Center (GE MTC) Inc., **Gebze, Turkey**
Consultant **Jan, 2010 - Apr, 2010**

- Helped GE MTC Engineers in doing FEA analysis of Aircraft Engine components using ANSYS

TEMSA GLOBAL Inc., **Gebze, Turkey**
Project Consultant **Sep, 2008 - Sep, 2010**

- Principal Investigator of the industrial project titled "Development of passive safety system for absorbing crash energy during frontal crashes involving intercity busses" funded by Ministry of Industry and Trade of Turkey under the scope of SAN-TEZ project

TEMSA GLOBAL Inc., **Adana, Turkey**
Senior Structural Engineer **Mar, 2005 - Sep, 2006**

- Managed all phases of bus rollover simulation projects (ECE R66), including building the FEA models in ANSA, preparation of mass lists, verification of all necessary analysis data (e.g. center of gravity and mass moment of inertias of rigid components, engine, axles, fuel pump, AC etc), analysis setup in LS-DYNA, running, verification, and certification.
- Performed 3D stress analysis of automotive parts under structural and dynamic loads using ANSYS and determined the critical locations and suggested design changes to obtain maximum life of components.
- Carried out modal analysis of various type of busses and created animations to illustrate several modes of excitation.

CD-ADAPCO Inc. (Now SIEMENS), **Melville, NY, US**
Senior Structural and Thermal Engineer **Sep, 2000 - Sep, 2004**

- Reviewed contracts with customer to determine analysis requirements and goals and best methods to achieve them.
- Identified possible causes of failure of a glass lining in a reactor.
- Conducted single cylinder thermal analysis of a six-cylinder diesel engine to understand the thermal behavior of the cylinder and the head.
- Performed 3D stress analysis of rotating parts in the gas turbines and compressors under thermal, structural and dynamic loads using ANSYS.
- Carried out modal analysis of a generator and created a movie to illustrate several modes of excitation.
- Performed thermal and structural analysis of EGR coolers used in truck engines, identified the regions susceptible to cracking and recommended design changes to obtain maximum life of the components.
- Models included thermal and structural loading, intermittent contact, friction and non-linear material properties.
- Created numerous programs and scripts to automate model generation, analysis set-up, and verification.

Granted Research Projects

E. Acar and M.A. Guler (2019-2021), "Design and optimization of a new energy efficient cylindrical roller bearing using contact mechanics and optimization techniques", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 35,000

M.A. Guler and D. Coker (2017 - 2020), "Numerical and experimental investigation of fracture propagation in composites with impact damage", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 100,000.

B. Yıldırım and M. A. Guler (2017 - 2018), "Design and optimization of the body and chasis of a new tram vehicle under dynamic and crash loads using Finite Element Method", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 50,000

M.A. Guler (2015 - 2016), "Examination of impact energy absorbing capacity of empty and aluminum based foam-filled crash boxes", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 10,000.

M.A. Guler (2013 - 2015), "Optimization of the structural parts and packaging of a dishwasher using Finite Element Method", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 135,000.

M.A. Guler and B. Aksoylu, (2013 - 2015), "Development of a method to predict strength and failure of layered composites using peridynamic theory". Budget $ 125,000.

M.A. Guler (2013), "Dynamic Analysis of a VSP Support Bracket as a senior design project", funded by OYAK RENAULT, Budget $ 1,500.

M.A. Guler (2013), "Design of a Shock Absorbing Component for a Front Bumper of an Automobile as a senior design project", funded by OYAK RENAULT, Budget $ 1,500.

M.A. Guler (2012), "Frontal crash analysis for the design of an automobile cockpit carrier as a senior design project", funded by OYAK RENAULT, Budget $ 1,500.

M.A. Guler, R.M. Görgülüarslan and Fırat Özer, (2011), "Side crash simulation analysis for monolithic production of reinforced parts as a senior design project", funded by OYAK RENAULT, Budget $ 3,000.

M.A. Guler and E. Acar, (2009 – 2011), "Accurate prediction and robust optimization of springback in dual phase steels during sheet metal forming operations", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 65,000.

M.A. Guler, (2008 – 2010), "Development of passive safety system for absorbing crash energy during frontal crashes involving intercity busses", funded by Ministry of Industry and Trade of Turkey under the scope of SAN-TEZ project. Budget $ 225,000.

M.A. Guler and S. Dag, (2007 – 2009), "Computational and Analytical methods for contact mechanics analysis of functionally graded material", funded by The Scientific and Technical Research Council of Turkey (TÜBİTAK). Budget $ 70,000.
